A close-up photograph of a man with a beard and glasses, wearing a maroon t-shirt, pouring a golden-yellow liquid from a clear glass bottle onto a white plate. The liquid is captured mid-pour, creating a thin stream that falls onto the plate. The background is softly blurred, showing the man's face and hands. The overall lighting is warm and natural.

Vegetable Oils

Edible High Oleic Vegetable Oils

Milktrade | Vegetable Oils – Private Label

Edible High Oleic Vegetable Oils

OUR PRODUCT

Sunflower oil from Serbia is the non-volatile oil compressed from the seeds of sunflower. Sunflower oil is commonly used in food as frying oil, and in cosmetic formulations as an emollient. This oil contains appreciable quantities of vitamin E sterols, and other. Sunflower oil is a monounsaturated polyunsaturated mixture of mostly oleic acid omega9, linoleic acid omega6, group of oils. Sunflower oil is high in the essential vitamin E and low in saturated fat. This type of oil is linoleic. Linoleic sunflower oil is common cooking oil that has high levels of polyunsaturated fat. All seed hybrids and the resulting different sunflower oils are mostly devoid of essential nutrients, with the notable exception of vitamin E which is high in content in all variety's nutrient tables

CUSTOM PACKAGING

We can offer a 1L, 2L and 5L packing solutions for your private label. All can be supplied with our without your label placed onto the packaging with low minimum cost.

Due to our flexibility, knowledge of the market and competitive pricing we do not require great MOQ's which gives our customers an option to **“Test the product”** prior to organizing a mass production.

A stack of pancakes on a plate with raspberries, topped with butter and honey being poured from a glass.
